

How Fantasy Distract us

Support Me : [CLICK HERE](#)

Every word changes its own nature in sentences .Based on the sentence. But indeed these words ply very fast. It doesn't belong to me utterly but at some point . I was working alone with focus on my work which I'd been doing and it's really difficult to work for yourself. Few times I thought I just needed someone to work with me or maybe I could work with someone. Such things seem much better when you're working alone. But physically it's not .I've found lots of communities which can help me a lot. Community helps when you're not working for yourself. Sound might be confusing to you. But that's what they do. Fortunately I didn't join any community. You know when we are in a group which can belong to anything we just lose our focus ,determination and all those things in which we were good . But we feel much better than before because all anxiety ,pressure of work goes away .We think I'm performing better. Actually we use our mind in different areas of life rather than focus on particular problems and our personal work has disappeared which makes us feel more comfortable and we think group and communities are good. It's an overview to illustrate what I wanted to convey. So there is a fantasy behind our assumptions which helps us partially but utterly distract us. Be in a community but work for yourself can help you to do what you want to accomplish . so let's get into it.

Sometimes small is Best.
