

# WHY BEGINNERS ADRIPT

SUPPORT ME :- [CLICK HERE](#)

Why we change our path or why we don't stick to certain things which we are willing to do . You know we are humans so it's human nature that we try to learn all the things simultaneously and we do as much as possible . so we came up with lots of ideas and we don't know what to stick with and we messed up all the plans that we have decided to accomplish in a specific period .But we try to follow all the things except what we have decided. So as a consequence we get nothing or we dwell on that topic until we get it or we blame someone else for that circumstance and the people around you try to make fun of you or they will entice you. Until you utterly ruin your life. so if you're a beginner don't listen to anyone instead yourself. One of my friends once said to me "it is not necessary that you can't manage adversity until you face it or can't save yourself from those. You can manage without getting into it . " You know we experience most things in our life by seeing someone or to get into it . so it's up to you to manage all the things . Once you have crossed those boundaries you are never gonna be misled by someone. So it's similar to writing about a topic without being or getting into. But we convey our ideas.

Please send me the topic which you want to get more about because i'm craving about blog nowadays but it should belong to #SOCIETY.
