## Healer and Dealer

I Think this sound might be Crazy for you but that is the fact which i'm gonna talk about . you know what all the things in this world depend on the way we Think . So Thinking is the most precious thing in the world. You can't think, You don't stop thinking . Read it again . you know we all want to become Successful Somehow . But most of them know one method to be Successful i.e education because most of our beliefs depend on other people's perspective. Education is not a problem which comes in your way to not become Successful. That is your thoughts and beliefs which put education in a negative part of your mind. You are not getting any Degree as a piece of paper . But While getting this paper you get lots of skills which define you who you are. Think about it because if something is not in written form then it can be forgettable . Best way to control your thinking I've learned from the book is " if you can solve it, then think about it ". Unless it is useless for you. You might be thinking about what he has written which someone has already said or you can call it Plagiarism. But the Dalai Lama said " You can't tell anything which you don't know ". So How thinking helps to Heal ourselves and deal with the problems and anything. If you really want to do both things then we have to control our actions while thinking and become aware of the thoughts and filter out according to which is good and suitable for you. But nowadays we are much aware about the thoughts but we don't like to take actions .My Brother friend once said to me "It's up to you . How you want to make your life by sleeping (soke) or to make it Gold (sona). If you think that these blogs are perfect for you Please Support Me.
